JavaScript Task 8

Q.no:01– Consider the following series.
1 1 2 3 5 8 13 21 34
Write a JavaScript program to print this series using recursive function

Q.no:02 – Write a JavaScript function that accepts a string as a parameter and converts the first letter of each word of
the string in upper case.
For example, The Quick Brown Fox

Q.no:03 – Write a JavaScript function that check whether the first and last digit of a number
Are same or not. If not, then call function that print the reverse of that number.
For example, reverse of 1435 is 5341

Q.no:04 – Write JavaScript code to enter 10 records for city (name, population). Using a separate function display the largest
city by population and having maximum characters in name.
